

CREFL User Manual

27 June 2024

Installation

- Download the Windows installation file.
- This software works on a Windows 11 PC.

Notes

- Describe accept/reject.
- Sweep Difference
- Number can be adjusted during the run.
- Number is arbitrary?
- SNR
- SNR is broadband.
- SNR relationship relative to leak measurement. In CRDP, we have been seeing larger SNR equated with a poorer seal of the eartip in the ear. Is SNR the best description of what CREFL is measuring?
- Sets and sweep sets definitions:
- Options -> Stimulus.
- Sweeps per Set: Also known as "reps." The number of sweeps in each set during the measurement phase.
- Number of Sweep Sets: Maximum number of sweep sets to be measured.
- Total number of sweeps= $2 \times \text{reps} \times \text{sets}$
